### ED 1/2 - 2 Ton Extended Duty Hoist
- Standard lift is 10 feet.
- Totally enclosed, fan-cooled motor for extended operation.
- Highly adaptable for automated plating, heat treating, steel warehouse, foundry, and machine shop use.

### LT 1/2 - 2 Ton Motorized Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop to 1 to 3 ton models.

### MT 1/4 - 5 Ton Motorized Trolley
- Trolley sideplates feature heavy-duty bumpers to act as safety lugs and to protect wheels.
- Available to fit wide-flange and patented track beams.
- Single and two-speed motorized models.

### CBT 1/4 - 5 Ton Plain & Geared Trolleys
- Designed to provide superior performance and long, efficient service.
- Wrap-around side plates act as safety lugs and protect wheels.
- Dual tread wheels fit tapered or flat beam flange within range of adjustment. Wheels include permanently lubricated, shielded ball bearings.

### CTA 1/4 - 5 Ton Push & Trolley
- Designed for easy operation with minimal effort.
- Wrap-around side plates act as safety lugs and protect wheels.
- Spark and corrosion resistant wheels available. Track clamps available on 1/4 to 4 ton models.

### CYA 4 - 25 Ton Push & Trolley
- For rugged, heavy-duty service.
- Available to fit wide-flange and patented track beams.
- Equipped with eight sealed Timken tapered roller bearings and grease fittings.

### VT-A 1/2 - 5 Ton Push & Trolley
- Quick set-up with unique dial fit adjusting collar.
- Fits American Standard beams, wide-flange and patented track beams.
- Hardened wheels and stamped steel side plates.
- Negotiates small radius curves.

### BC 1 - 10 Ton Beam Clamp
- Special clamp jaw design reduces flange stress by distributing load away from flange edge.
- Built-in suspension bar provides lower headroom.

### LT 1/2 - 2 Ton Model Trolley
- Rated loads from 1/2 to 2 ton: plain and geared models
- Plain trolley for manual positioning of hoist and load.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### HT 1/2 - 2 Ton Model Trolley
- Rated loads from 1/2 to 2 ton: plain and geared models
- Pain trolley for manual positioning of hoist and load.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.

### LT 1/4 - 5 Ton Model Trolley
- Rated loads from 1/4 to 3 ton in plain and geared models.
- Plain trolley for manual positioning of hoist and load - 1/4 to 3 ton models.
- Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9’6” hand chain drop.
- Trolley side plates are all steel for maximum strength.
Standard lifts are 10, 15, and 20 feet.

- Hook, lug, plain, geared, and motorized trolley suspensions.
- 5-pocket load sheave improves chain support and reduces wear.
- Overload limiting clutch guards against lifting of damaging overloads.
- Adjustable upper and lower limit switches prevent overtravel.
- Dual braking system - motor and load brakes.

Standard lift is 10 feet.

- Aluminum housing.
- Overload limiting clutch.
- Swivel top and bottom hooks w/ safety latches standard.
- Grounded 3-prong plug - easy installation in any std. 115 V outlet.
- Compact design
- Upper and lower limit switches.
- Thermal motor protection.
- Light duty operation.

Standard lift is 5 feet.

- Dual ratchet and pawl - bearings.
- Link chain, Aluminum housing.
- Easy operation from either side.
- Roller chain.
- Malleable iron housing.

**Coffing Hoists Feature A Lifetime Warranty On All Products**

---

EC 1/4 - 5 Ton Electric Chain Hoist

- Standard lifts are 10, 15, and 20 feet.
- Hook, lug, plain, geared, and motorized trolley suspensions.
- Oil bath transmission - gears run longer, quieter.
- Overload limiting clutch guards against lifting of damaging overloads.
- Adjustable upper and lower limit switches prevent overtravel.
- Oil-filled transmission runs cooler and lasts longer.
- Adjustable lug mount, plain, geared & motorized trolley suspensions.

Standard lift is 15 feet.

- Fully-modified electric chain hoist with two load hooks.
- Completely-inverts virtually any shape load with use of simple slings and successively repositioned load hooks.

Standard lift is 20 feet.

- Variable speeds up to 50 FPM 1/4 to 1 ton and up to 60 FPM 2 and 3 ton.
- 8-vane motor provides high torque, smooth starting, and excellent control.
- Handle-mounted pendant control provides one-handed operation.
- Disc brake secures load.

**Electric Chain Hoists**

---

JLC 1/8 - 2 Ton Electric Chain Hoist

- Standard lifts are 10, 15, and 20 feet.
- Hook, lug, plain, geared, and motorized trolley suspensions.
- Oil bath transmission - gears run longer, quieter.
- Overload limiting clutch guards against lifting of damaging overloads.
- Adjustable upper and lower limit switches prevent overtravel.

- Standard lift is 10 feet.

**Electric Chain Hoist**

---

WR 1/2 - 5 Ton Wire Rope Hoist

- Standard lifts to 70 feet.
- Select single or double reeved and low headroom models.
- Adjustable upper and lower limit switches prevent overtravel.
- Dual braking system - motor and load brakes.

**Electric Chain / Wire Rope Hoists**

---

**Wire Rope Hoist**

---

**Standard Lifts**

---

EC 1/4 - 4 Ton Electric Chain Hoist

- Standard lifts are 15, 20, and 25 feet.
- Heavy-duty, specially modified electric chain hoist with two load hooks.
- Overload limiting clutch.
- Overload limiting clutch.
- Overload limiting clutch.
- Overload limiting clutch.

Standard lift is 25 feet.

- 10-pocket oblique lay steel wire rope provides longer chain life.
- Variable flow, two lever pendant for precise load spotting.
- Industrial duty air motor for tough applications.

---

SLA 250 - 1000 lb. Air Powered Hoist

- Standard lift is 10 feet.
- Heavy-duty, lightweight, compact design. Great for commercial and industrial applications.
- Standard protector overload device.
- 10-pocket oblique lay steel wire rope provides longer chain life.
- Variable flow, two lever pendant for precise load spotting.
- Industrial duty air motor for tough applications.

---

SLC 250 - 1000 lb. Electric Chain Hoist

- Standard lift is 10 feet.
- Very compact and light weight.
- Standard protector overload device.
- Thermally protected hoist duty motor.
- Epoxy powder coat finish.
- Job proven - industrial and commercial applications.

---

**Standard Lifts**

---

YLHA 1/8 - 6 Ton Dual Hook Chain Hoist

- Travels Easily on curved beams.
- Low headroom provides increased hook travel & maneuverability in tight places.
- Steel construction means hoist and trolley are built for maximum strength.
- Weston type load brake assures positive and efficient load control with minimal maintenance.
- Lifetime Warranty

EC 1/4 - 5 Ton Electric Chain Hoist
- Standard lifts are 10, 15, and 20 feet.
- Hook, lug, plain, geared, and motorized trolley suspensions.
- Oil bath transmission.
- Adjustable upper and lower limit switches prevent overtravel.
- H4 duty cycle. Rated for commercial & industrial applications.

JLC 1/2 - 2 Ton Electric Chain Hoist
- Standard lifts are 10, 15, and 20 feet.
- Hook, lug, plain, geared, and motorized trolley suspensions.
- Oil bath transmission - gears run longer, quieter.
- Overload limiting clutch guards against lifting of damaging overloads.
- Adjustable upper and lower limit switches prevent overtravel.
- H4 duty cycle. Rated for commercial & industrial applications.

WR 1/2 - 5 Ton Wire Rope Hoist
- Standard lifts to 70 feet.
- Select single or double reeved and low headroom models.
- Adjustable upper and lower limit switches prevent overtravel.
- Oil-filled transmission runs cooler and lasts longer.
- Adjustable lug mount, plain, geared & motorized trolley suspensions.

EC 1/4 - 4 Ton Electric Chain Hoist
- Standard lift is 15 feet.
- Heavy-duty, specially modified electric chain hoist with two load hooks.
- Completely inverts virtually any shape load with use of simple slings and successively repositioned load hooks.

LHH 1/2 - 10 Ton Slack Chain Hoist
- Standard lifts are 10, 15, and 20 feet.
- Compact and lightweight size allows easy installation and portability.
- Bearing-mounted pinions increase efficiency and ease of operation.
- Through hardened load chain for added strength and wear resistance.
- Economical yet durable.

SLA 250 - 1000 lb. Air Powered Lift
- Standard lift is 10 feet.
- Heavy-duty, lightweight, compact design. Great for commercial and industrial applications.
- Standard protector overload device.
- 10-pocket oblique lay liftwheel provides longer chain life.
- Variable flow, two lever pendant for precise load spotting.
- Industrial duty air motor for tough applications.

SLC 250 - 1000 lb. Electric Chain Hoist
- Standard lift is 10 feet.
- Hook suspension.
- H4 duty cycle.
- Very compact and light weight.
- Standard protector overload device.
- Thermally protected hoist duty motor.
- Epoxy powder coat finish.
- Job proven - industrial and commercial applications.

YLHA 1/2 - 6 Ton Slew Hoist Chain Hoist
- Travels Easily on curved beams.
- Low headroom provides increased hook travel & maneuverability in tight places.
- Steel construction means hoist and trolley are built for maximum strength.
- Weston type load brake assures positive and efficient load control with minimal maintenance.
- Lifetime Warranty

AMT 1/2 - 6 Ton Motor Air Trolley
- Variable speeds up to 50 FPM 1/4 to 1 ton and up to 60 FPM 2 and 3 ton.
- 8-vane motor provides high torque, smooth starting, and excellent control.
- Pendant throttle control provides precise, controlled spotting and efficient load handling.
- Wheels are forged, heat-treated steel, with dual tread for use on Standard or wide flange beams.

TMM-140A 1/4 - 20 Ton Air Manipulator
- Rotary vane motor provides high, uniform torque for quick response and smooth, quiet operation.
- Self-winding, galvanized wire stores internally.
- Handle-mounted pendant control provides one-handed operation.
- Disc brake secures load.

EMC 200 - 500 lb. Electric Chain/Wire Rope Hoist
- Standard lift is 10 feet.
- Seivral top and bottom hooks with safety latches standard.
- Grounded 3-prong plug – easy installation in any std. 115V outlet.
- Compact design
- Upper and lower limit switches.
- Thermal motor protection.
- Light duty operation.

Cable Hoists 1/4 - 2 Ton
- Single and double line.
- Lift heights to 29 feet.
- Reversible handle bends when overloaded.
- Lightweight and rugged.

Coffing Hoists Feature A Lifetime Warranty On All Products

Longer Lifts Available On Most Hoists – Please Call For More Information
ED 1/2 - 2 Ton
Extended Duty Hoist
• Standard lift is 10 feet.
• Totally enclosed, fan-cooled motor for extended operation.
• Highly adaptable for automated plating, heat treating, steel warehouse, foundry, and machine shop use.

LT 1/2 - 2 Ton
For CAD Model Air Hoists
• Rated loads from 1/4 to 3 ton in plain and geared models.
• Plain trolley for manual positioning of hoist and load.
• Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9'6" hand chain drop - 1 to 3 ton models.

HT 1/2 - 2 Ton
For CAD Model Air Hoists
• Rated loads from 1/2 to 2 ton: plain and geared models.
• Plain trolley for manual positioning of hoist and load.
• Geared trolley for more precise positioning of hoist and load. Geared trolleys have standard 9'6" hand chain drop.
• Trolley side plates are all steel for maximum strength.

MT 1/4 - 5 Ton
Motorized Trolley
• Trolley sideplates feature heavy duty bumpers to act as safety lugs and to protect wheels.
• Available to fit wide-flange and patented track beams.
• Single and two-speed motorized models.

CBT 1/2 - 5 Ton
Plain & Geared Trolleys
• Designed to provide superior performance and long, efficient service.
• Wrap-around side plates act as safety lugs and protect wheels.
• Dual tread wheels fit tapered or flat beam flange within range of adjustment. Wheels include permanently lubricated, shielded ball bearings.

CTA 1/2 - 5 Ton
Plain & Geared Trolleys
• Designed for easy operation with minimal effort.
• Wrap-around side plates act as safety lugs and protect wheels.
• Spark and corrosion resistant wheels available. Track clamps available on 1/4 to 4 ton models.

CYA 4 - 25 Ton
For rugged, heavy duty service.
• Available to fit wide-flange and patented track beams.
• Equipped with eight sealed Timken tapered roller bearings and grease fittings.

VT-A 1/4 - 5 Ton
For CAD Model Air Hoists
• Quick set-up with unique dial fit adjusting collar.
• Fits American Standard beams, wide-flange and patented track beams.
• Hardened wheels and stamped steel side plates.
• Negotiates small radius curves.

BC 1 - 10 Ton
Beam Clamp
• Special clamp jaw design reduces flange stress by distributing load away from flange edge.
• Built-in suspension bar provides lower headroom.
