

Cant Hook

Dixie Industries manufactures Cant Hooks from the highest quality materials available.

Wooden handles are top quality straight grain white mountain hickory hardwood, kiln dried to 18% moisture content, then precision cut to an exact fit.

Aluminum handles are made of anodized aluminum which lasts considerably longer than non-anodized aluminum when used in wet or corrosive work environments.

Duckbill Hooks are drop forged with the bills ground to a fine point. Clasps and extension toe rings are ductile iron castings for long lasting service.

Replacement parts including handles, duckbill hooks, extension toe rings and clasps are available.
